
History

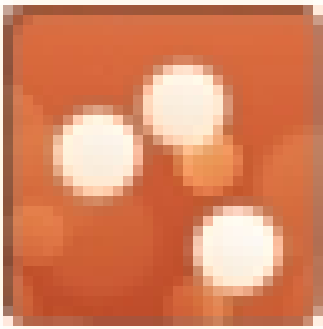

TELNET, Inc. is a telecommunications and Information Technology (IT) solution provider. It was founded in 1995 by Hootan Roosta as an engineering consulting firm and soon after the IT and Operations divisions were established to provide clients with cost-effective and superior products and turnkey services and give them the edge in today's competitive market place.

Telnet has been providing Wireless Network related Services to Wireless carriers and Wireless Equipment providers for more than 20 years.

Our Knowledge and Expert Engineers have worked with leading Wireless carriers and equipment manufacturers in Network Planning and Design, New Network Roll out, integration of multiple technologies and Optimization of New and Existing Networks.

Telnet is considered a unique addition to its client's team due to its expertise in Wireless field

- We have experience in working on multiple technologies and have worked in every OEM Platform
- We understand the business model of the wireless industry and can provide flexible solution to our clients aimed to meet their specific goals.
- Capability in complete lifecycle of a Wireless Network build and Optimization Project. We have assisted our clients in projects ranging from Site design, candidate selection, zoning, Site build and making it launch ready (Pre Launch Optimization) to Post Launch optimization to improve KPI.
- We have worked on iDEN, CDMA, GSM, UMTS, EVDO, WiMAX, LTE Networks and In-Building Solutions such as DAS Design and Optimization.
